PROJECTS

IDscnr - On-Premise ID Scanning & Check-In Automation:
Developed a secure Windows application that scans IDs and passports using OCR, checks DNR lists, and auto-fills PMS systems, reducing guest check-in time to approximately 3 seconds while improving accuracy and front-desk security.

E-Commerce Customer Segmentation Dashboard:
Built an interactive Streamlit dashboard using RFM analysis and K-Means clustering to segment customers, visualize purchasing behavior, and generate actionable insights to identify high-value, loyal, and at-risk customers. [Live Demo](#)

Data-Driven Insights into Gun Violence for Community Intervention:
Created an end-to-end analytics and visualization platform using Chicago crime and socioeconomic data to analyze trends, detect hotspots, predict high-risk neighborhoods, and present insights through an interactive Streamlit dashboard. [Live Demo](#)
